

Operation Green Play

Your role in promoting clean, healthy and sustainable communities.

Energy

Reducing our reliance on fossil fuels for energy through the promotion of renewable energy sources, energy efficiency initiatives, and energy conservation practices.

Food

Reducing the ecological impacts associated with food served at sports venues and events by promoting healthier, more sustainable food programs, and foodservice practices that promote waste reduction, and energy and water efficiency.

Procurement

Promoting purchasing policies that make use of ecologically preferable products, including paper, cleaning products, and serviceware.

Transportation

Encouraging a shift away from fossil fuel-dependent transportation by incorporating smarter travel strategies at sports venues and events, including public transit, bike racks, and pedestrian walkways.

Venue

Advancing sustainable, high-performance design and operations of sports venues that promote environmental and human health for staff, athletes, and fans.

Waste

Promoting zero waste strategies through source reduction, recycling, composting, and food recovery.

Water

Advancing water security by encouraging practices that reduce water pollution and promote water conservation.
